

Variables in Memory

Code: `r = 0.03`

Object stored in
Memory

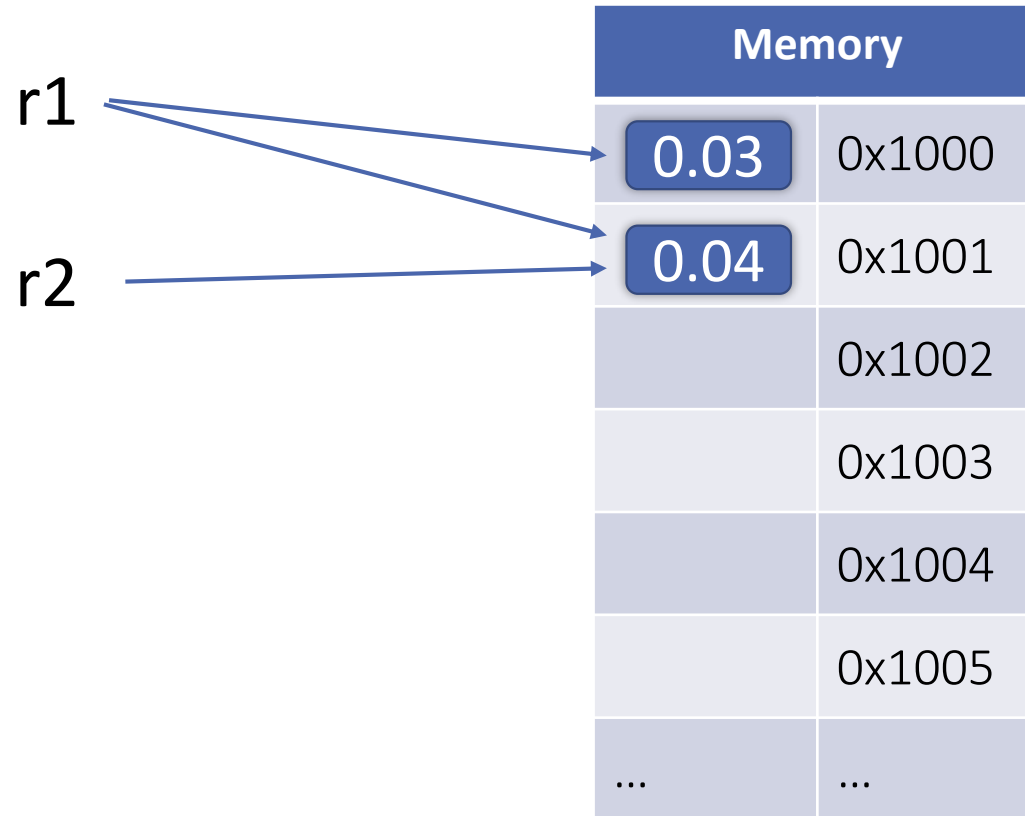

`r`

„The variable `r` is referencing (pointing to) to the Object stored in Memory Address `0x1000`.“
-> Variables are **Memory References**

„The Object `0.03` is assigned to the variable `r`.“

Memory	
0.03	0x1000 ← Memory Address
	0x1001
	0x1002
	0x1003
	0x1004
	0x1005
...	...

Variables in Memory

Code: `r1 = 0.03`

Code: `r2 = 0.04`

Code: `r1 = r2`

Variables in Memory

Code: `r1 = 0.03`

Code: `r2 = 0.04`

Code: `r1 = r2`

Code: `r2 = 0.05`

Code: `r2 = r2 + 0.01`

Variables in Memory

Code: `r = 0.03`

Code: `PV = 10,000,000`

`r`

`PV`

Memory
